CAREER OBJECTIVE

Entry-level Front-End Developer and UI/UX enthusiast with hands-on internship experience in building responsive, user-friendly web interfaces using HTML, CSS, JavaScript, React, and Bootstrap. Skilled in translating UI designs into functional web pages and collaborating with teams to deliver clean, visually appealing solutions. Seeking an opportunity to contribute to modern web applications while continuously improving frontend and full-stack development skills.

EDUCATION

Bachelor of Technology | *Information Technology* 2020 – 2024
Jaya Engineering College CGPA: 8.1

TECHNICAL SKILLS

Frontend Development: HTML, CSS, JavaScript, React, Bootstrap.
UI / UX & Design Tools: Figma, Canva, Responsive Design, UI Prototyping.
Tools & Platforms: GitHub, Unity 3D.

WORK EXPERIENCE

Web Developer Intern Nov 2024 – May 2025
AmsonWebz.

- Customized and enhanced website templates using HTML, CSS, JavaScript, and Bootstrap.
- Improved website responsiveness and cross-device compatibility.
- Collaborated with designers and developers to implement UI changes. Followed clean coding practices and version control using Git
- Gained real-world experience in building professional, user-centric web interfaces.

PROJECTS

Smart College View using Augmented Reality | *Jaya Engineering College* Feb 2024 – April 2024

Developed an Augmented Reality (AR)-based virtual campus exploration system for interactive navigation and visualization. Designed and integrated 3D campus models using Unity3D, creating an immersive and interactive environment. Implemented AR-based visualization concepts using ARCore/ARKit, enabling users to explore campus facilities through mobile devices. Worked on 3D asset integration, scene configuration, user interaction, and AR experience design.

Unity Game Developer – Hackathon Project | *Avalanche Team1* Agu-2025

Designed and developed gameplay features for a 3D FPS game using Unity and C#, including player movement, weapon/shooting systems, animations, UI, environment integration, and combat interactions. Debugged and tested gameplay functionality while working within a time-constrained hackathon development cycle.

LexiBattle – Multiplayer Word Search Game – Hackathon Project | *Vibthon 2025* Dec-2025

Developed LexiBattle, a multiplayer word-search game using HTML, CSS, and JavaScript during VIBTHON 2025. Implemented single-player, two-player, and online multiplayer modes with an interactive drag-and-select interface, and integrated Sui blockchain wallet connectivity for Web3-enabled gameplay.

CONFERENCES AND PRESENTATIONS

Smart College View Using Augmented Reality

International Journal of Advanced Research in Computer and Communication Engineering (IJARCCE), Vol. 13, Issue 4

- Published research paper presenting an AR-based smart campus visualization system. Available at: <https://ijarcce.com/papers/smart-college-view-using-augmented-reality/>. April 2024
